

## MISSION STATEMENT:

Our mission is to become the most valuable and customer oriented company with focus of CSAT with Advance roofing solution providers through committed and dedicated team with constant focus on quality, Innovation, Engineering, Timely Solution and customer service with integrity and values.

## ABOUT US

We Skyarch wish to introduce ourselves as skylight installers, Structural Fabricators, Project Management Consultants.

Skyarch provides Architects, consultants, and clients and contractors with a single contact point for sourcing high quality custom designed skylights & roof glazing systems with structural fabrications and consultancy as per requirement.

Our key staff has a wealth of experience gained through involvement in a wide range of different types and sizes of projects including some of the most difficult geometric configurations.

We are specialized in providing end to end solutions for various unique building/design requirements, SKYARCH uses cutting edge technologies, computer aided design software, with safety factors of structures.

We aim to provide our clients with continuous breakthrough in design innovations, redefining the quality and standards of our work.

The product section illustrates typical skylight designs we offer including pyramids, Barrel vaults, bullet proof and vandal proof glazing, tensile structures, dome structures, however we are prepared to consider virtually any conceivable design.

## SERVICES:

Our experienced sales and design personnel undertake survey of existing installations and make recommendations for suitable civil requirements.

## DESIGN:

Our company in house structural designers provides design detail, structural stability consultancy, drawings and execution drawings compliance with safety factors and water tightness.

## TOTAL INFRASTRUCTURE:

Our company takes a total turnkey basis projects with facilities of Fabrication, Machineries latest Power tools, to cater to the requirements of large infrastructure projects at the site with quality control.

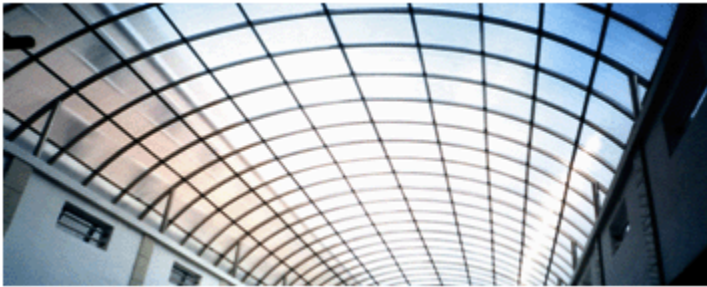

## TEAM:

Our company has 55 strong workforces to provide the capability to undertake large scale projects, yet is structured to enable an attention to detail that is evident in all of our works even at the smallest scale.

## SKYARCH PRODUCT RANGE:

### SKY-LIGHT

Custom Designed Skylights with structural stability of Glass and Polycarbonate.

#### Shapes:

Domes, Pyramid, Bubbles Vault Roofs, Hipped Roofs, and Gable shaped roofs etc

#### Product Features:

- High impact strength
- Design freedom
- UV resistance

#### Applications:

Atrium Covering, Walkways, Courtyard covering, swimming pool covering, canopies etc.

## SKY-MOUNT

Sky mount curb mounted skylights offer the freedom of both standard and custom shaped configurations and can come in sizes upto 6 feet square Maximum.

### Product Features:

- Ready to use
- Available in transparent
- Translucent types
- Water tight system
- Most rigid fire and smoke venting systems
- No Fabrication required at site

### Applications:

Small Skylight Covering

## SKY-PROOF

Bomb blast resistant windows and doors- Skyarch has developed a system of bomb blast & vandal resistant doors and windows with Lexgard sheets, Margard Sheets and Laminates, which provide effective bomb blast protection to human beings and property. The combination of metal profiles and lamination technology results in a system which absorbs the energy and impact of an explosive blast.

### Applications:

- Banks Counters
- ATMs
- Defense Head Quarters
- High Security Areas

## SKY-FABRIC

Skyarch has developed Skyfabric - tension membrane systems/structures with PVC coated polyester, PTFE coated glass and Silicon coated glass cloth as well as lycra and pvc coated glass fabric meshes for interior use. Our work encompasses of advanced light weight building systems.

Skyfabric is the most structurally efficient building system available today. It has an extremely wide scope for conceptualization of any architectural shapes and thus consultants are increasingly utilizing this system in their designs in order to achieve light weight, efficiency, aesthetics and economy.

### Applications:

- Amphitheatres
- Food courts,
- Stadium Airports
- Garden Umbrellas

## SKY-ROOF (Pre-Engineering Building Systems)

Skyroof brand roofing systems offer industrial and commercial roofing services with precoated profiled Galvanized Steel Sheets (Indian/Imported Sources), Profile Bare Galvalume Sheet; Profiled color coated Galvalume Sheets which provide a good aesthetic appearance, high durability, light weight, high strength, easy maintenance and are cost effective.

All work is carried out by workmanship and material guarantee.

### Product Features:

- Durable and strong
- Superior corrosion resistance
- Thermal reflectivity
- Low maintenance
- Weather resistance
- Environmentally friendly

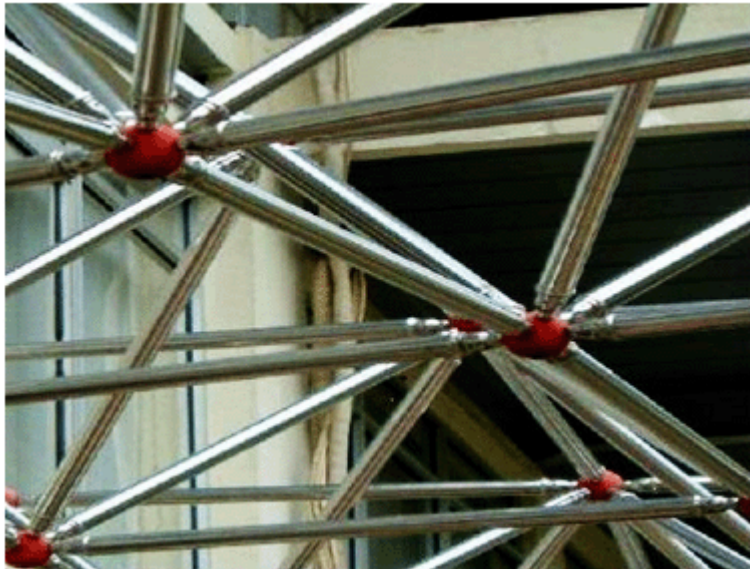

### Applications:

Food Court Area, Factory Buildings, Factory Shades, Auditoriums, Parking Areas etc.

# SKYFRAME

SPACEFRAME modular spaceframe structures is a practical and economical approach to cover spaces of almost any size or shape. Design flexibility is maximizing while the construction itself is of standard elements.

Space frame is a 3 dimensional structural network that consists of three kinds of elements-ball joints, pipe & connector set to connect them together. Sky-grid can be designed for long span upto 100 meter span capability.

## Product Features:

- Rigidity
- Light Weight
- Quick Installation time
- Flexibility
- Factory Finished to any color

## COMPONENT AND MATERIAL SELECTION:

Appropriate material selection and fixing systems will be recommended based on Size, Shape, Slope and Site conditions. Our Proprietary glazing systems with EPDM Rubber gaskets provides complete leak proof system.

## EXECUTION:

Company's skilled execution team provides professional fixing and fabrication of structures with cutting edge technology tools and safety gadgets ensuring on time delivery. All work is carried out by our skilled operatives and is covered by our comprehensive workmanship and material guarantee.
